

Trainee/Internship Program Offer

(10290) Full Stack Engineering Program – Santa Monica, CA

Start Date: April – May 2017

Hours: 40 hours per week

Training Duration: 12 - 18 months

Compensation: \$20 per hour

Housing: assisted to find

Number of Positions Offered: 1

Host Company Description:

The host company is a well-funded technology startup that has created a web application product that personal assistant that automatically gets consumer's money back on almost every e-commerce transaction. The app automatically tracks your purchases, find better prices, and files refund claims. The company has experienced a steady growth in its first year of operation and is offering tech-savvy applicants to join the exciting product development team.

The participant will collaborate with various company teams (product, marketing, operations) and experience real impact on company's live product. If you like technical challenges (price tracking, big data, email parsing, web scraping...), and you feel like you could be a good fit for a small but fast growing startup. You will learn how to find solutions to multiple technical challenges, assist in building scalable and reliable algorithms and scripts that can effortlessly handle millions of users, driving new releases of our backend platform and new product releases which includes designing and developing more efficient systems, algorithms and applications.
